

Attract Customers via Their Smartphones
with ProxComm Proprietary Proximity Beacons, ProxID QR Codes & Geofencing

Our proximity marketing solutions are focused on **ProxComm Proximity Marketing Leveraging Beacons, ProxID QR Code & Geofencing Technology**. Our platform makes it simple for any business regardless of size to take advantage this masterful cutting-edge technology to market and promote their business, seeing results and statistical information.

ProxComm Beacon Marketing

Already proven in Europe and Asia, *ProxComm Proximity Beacons* are the expanding revolution of direct marketing. Beacons afford you the ability to provide real-time push notifications about products, deals, events, inside and outside your business.

Geofencing – Proximity Marketing

Create proximity boundaries around your businesses to create a consumer Geofence. Once consumers drive or walk through a Geofence they receive immediate push notifications of deals, products, special events information and much more.

Deals, Products, Information & Notifications

How do businesses get real-time notifications to potential customers around their store? Beacons & Geofencing that is how! *ProxComm*

Proximity Marketing transmits real-time notifications to consumers when they are most likely to use them. We are all impulsive buyers; timely notifications are that gentle reminder.

Grow Repeat Business

Using *ProxComm Proximity Marketing* increases repeat business with notifications of deals, specials and other information sent from your business. Either by the *ProxComm Proximity Marketing* beacon or the ProxID QR Code which emulates the beacons.

Leverage Your Location

Transform your location and the area around your business into a digital marketing zone. The Smartphone is the common denominator for us all, we don't leave home without it! Consumers shop with their Smartphones and want local information. **Social is Local** and that is where you will win over new and repeat customers.

Powerful ProxComm Push Notifications

Engage customers with push notifications based on their location about deals, specials, events, product information and more.

ProxComm Technology's Proprietary Proximity Marketing works with our ProxComm Beacons and ProxID QR Codes. Meaning that we are available to all Smartphones, via Google Nearby, QR Code and iOS Beacon with or without a mobile App.

If your company already has a Mobile App we will supply you with an SDK (a software development kit) to add to your App software which will work perfectly on all platforms.

The ProxComm Power of Notifications opens a whole world of communications for:
