

Digital Policing 2018 – The Fourth Musketeer

Policing has been attempting to play catch-up since 1829 and Sir Robert Peel's Peelian Principles, which still stand today, but with the necessary ability with created crime fighting technology.

Crime fighting is just that, *Alexander Dumas*, wrote the 'Three Musketeers' who fought against evil.

Then came the *Fourth Musketeer*, who improved the original core for fighting evil on all fronts. That today is **CommSmart Global Group, a LexisNexis Risk Solution Partner**.

Not only the **Accurint Suite** of public safety software, databases, with a direct connection to over 65 billion current public records, detecting fraud, verify identities and conducting investigations through cross-border criminal databases.

Enabling public safety to have the necessary crime-fighting tools at their fingertips with Mobile App connectivity, proximity contextual communications and now, enhanced Recognizer Technology CCTV investigations tools which have dramatically brought investigation time frames into perspective. Enabling the capabilities to capture, review, identify and produce for the investigation team, results, in what is now a time warp speed, like nobody ever envisaged would be available. Allowing time to literally stand still compared to what you are using today with increased success, reducing costs and

invigorating investigations teams.

CCTV is now front and center in regard to evidence availability, private security of buildings, commercial operations, residential neighborhoods and everyone now carries a Smartphone. Different capture devices with differing formats, which drive Crime Scene Investigators crazy. That is, until now, times have radically changed and will continue to do so in the capabilities of capture and review.

It starts with the immediacy of CCTV data capture and our unique Global Partnership:

- 👤 **The unique handheld device – Midas Response**
Daetech Systems (UK) Ltd research and develop bespoke evidence retrieval, evidence processing and intelligence gathering solutions for Law Enforcement, Military, and Government Agencies
- 👤 **Human Observers, the ability to pick a face out of a crowd - Super Recognisers International.** In London alone it is estimated there is one CCTV camera for every fourteen people. Surveillance technology is continually advancing and can be utilized to deliver clearer video imagery containing footage of crimes and missing persons. We have combined Super Recognisers, members of our team with the skill to identify people from CCTV images, along with experienced investigators, to form Super Recognisers International (SRI); the forefront of CCTV investigation.
- 👤 **CommSmart Global Group is the enablers that have encapsulated all, with the analytics, professional understanding, coaching and certification of these fine dramatic crime solving changes.**
- 👤 **Digital Policing Created For NOW!**

CCTV investigations have been time-consuming and eat away at the budgets which have been depleting continuously.

At long last, there is a solution which is proven already in Europe and beyond. It is our collective logical knowledge and sharing attributes that bring you the answers that you desperately require.

Let us converse, that simple, we know what it is costing you now, let us reduce the overall costs, expand the capabilities of officers and reduce crime which is demanded by all.
