

## What If You Could Be with Every Ambulance or Tow Truck at the Scene of an Accident?

**ProxComm Location/Proximity Notification Beacons** can place your law firm auto repair shop at the scene of accidents 24/7/365 without having to get out of bed or even be there.

This closing argument would be accepted by any jury of your peers. Acceptable in its cost-effective delivery to over 65% of all Smartphones in the USA!

What is the first thing anyone in an accident reaches for? Their Smartphone!

Placed in an Ambulance or Tow Truck is a small beacon is placed on the dashboard or clipped to a visor and transmits within a 300-foot radius to Smartphones with a notification which is a message and clickable URL which takes them to a law firm who is offering their legal services and advice. They simply open the notification, click the URL, it is as simple as that, taking them to a special Splash page or a direct number to call.

The legal firm purchases an advertising flight and is the revenue is shared to a tow truck or ambulance service of 10% of the advertising revenue per month. This marketed through agencies who specialize in legal advertising sales.

The analytics are based on the number of people who address and open the **notification** which is available to the advertisers.

This a whole different marketing approach and profit center brought to you by the global leader in **Location/Proximity Notification Beacons, ProxComm.**
