LENS S – Real-Time Effective Alerts for Successful Global Communications

The immediacy of delivered information saves lives. Too many are hung up with complex communications and protocols, it is simply being able to create an important message or have at your fingertip's current information in real time. Yes, it is always about time, the ticking clock means the action is demanded now!

The successful **L**aw **E**nforcement **N**etwork **S**haring **S**olution is now available as a commercial secure communications platform which is necessary for this age of aggressive social concerns, 'soft targets', concerns from domestic terrorism, terrorists and all familiar domestic disputes or disgruntled employee/client. These are front and center, right on your doorstep and when they occur, direct communications have never been so vital.

I know you have been approached by mobile phone providers, private communications companies all claiming they have the answer, they do not have the necessary solution.

No one needs direct real-time communications more than law enforcement and that is where **LENS S** started and was conceived by former police officers. This has a proven track record and is what is required and demanded in light of violent events in cities around the world.

It has many facets, so let us start with a simple means of knowing who is entering your facility if they are a concern or maybe banned. Important events of concern can be shared immediately to all your staff. **Immediately** means in under fifteen (15) seconds via SMS text and/or email. This includes the details of the event or person, a captured photograph and even *Geo-Fence* an area that locks in the zone of concern. This event is then communicated to law enforcement in the same manner with the same information regarding the item of concern.

This is distributed across all of your corporate facilities or as a group of hotels, casinos, event or sports centers, retail stores, business facilities, university/college grounds/buildings, and even a cruise ship. **Yes, anywhere that you need solid disseminated vital information.**

Shall we communicate? We know you have needs, let us discuss the answers...

LENS S is the Change...
