## Universal Network Sharing Solutions are Equal to $E=MC^2$

**Policing & Commerce Survives on Real-Time Street-Level Data/Information Sharing, Which It Is Lacking**

**By Nicholas Ashton, Police Best Practice Strategic Alliance Development**

Without communications and the exchange of data/information, everything is at a standstill.

*Effective communication plays a very important role in any organization. The best thing to get organizational goals or objectives, communication is the most important thing. However, in some organization, communication, unfortunately, is neglected and is the main issue for those companies who are not performing well. The employees who have poor communication skill in the organization have fewer chances of growth and development, so it is very important and critical issues for the organizations nowadays. (Gopal, Namita G.: 2009)*

Sounds like a great quote and it is, sadly it is flawed and does not even touch the real reasons of communicating or understanding the reality of our unsocial world today. It is a semi-fluff statement but quoted by so many who believe they are authentic communicators; they are not!

Crime and criminality are globally higher than ever and being fought with reduced budgets to challenge a sophisticated band of criminals, gangs, terrorists, drug cartels, money launderers, pedophiles, human traffickers, and white-collar miscreants.

Our substantial work and success with law enforcement within **Currency Tracking, Money Laundering**, and the **communicative skills of sharing information in real-time** across cities, states, borders, and globally through proprietary software is unmatched. It is not just connected to policing; it has proven universal attributes that go way beyond your expectations of the world of A.I. and real-time databases that opens a realm of opportunities you never dreamed possible.

604 Locust Street, #1108 Des Moines, Iowa 50309

**POLICE BEST  
PRACTICE**

WWW.POLICEBESTPRACTICE.COM

The difference is simple; we still have our feet firmly on the ground and know the ramifications of our capabilities. Our team is visionaries that visualize needs, demands, and the implementation in real, straight-talking terms. We converse, listen, examine, and importantly discuss the issues as we have lived and breathed them daily.

Information/data all have a DNA which links to many opportunities if only you had the mechanism to connect, understand, and share. It has been missing for far too long and has now returned to evolve your capabilities for deducing the now presented facts to your eyes, mind, and fingers. It is a whole different communication world of *facts and fingertips* through the Smartphone, which empowers your newer recruits and employees that were born with a Smartphone in their mouths.

The fact is, with policing as an example, 80% of all incidents have no real reported points, just checkboxes which do not reflect the occurrence or further possibilities. Not just for that officer, but others investigating similar or the same issue. It is lost data that will solve crimes on the books. Policing does a 180-degree change when utilizing **Network Sharing Solutions**.

We are not limited to policing in any way, our spectrum of data/information does not preclude any type of corporation for securing infrastructure, employees or patrons, which is so necessary for today and our future.

Emergency Management	Fire Departments	Education Facilities	Municipal Buildings
Hospitals	Casinos	Cruise Lines	Sports Events
Event Arenas	Retail Shopping Malls	Child Care Centers	Assisted Living Centers

Yes, all of the above have the opportunity to utilize our **Network Sharing Solution**, which includes changes in **License Plate Recognition** that is beyond what is in use today globally. It also includes **Object Comparison**, which changes the usage of all CCTV collected or real-time footage, making it more of human interaction with increased success.

It is your **Duty of Care** to understand who is entering your facilities and having the data/information infrastructure to handle the flow of necessary information that passes right in front of your eyes every single second. You cannot afford to blink and miss the obvious.

**WE ARE IN THE NOW & KEEP YOU; IN THE KNOW...**
