Border Patrol and the Delays in Obtaining Search Warrants is More than Resolved

The borders of the United States have more issues than the headlines of a newspaper or footage was shown on television news can report. With the massive influx of illegal immigrants attempting to circumvent legal border crossings, Border Patrol has more than its hands full to gather intelligence from those they stop and detain.

Who doesn't carry a Smartphone? It is our lifeblood with so much information stored within that can assist law enforcement tracking those that arrange passage across the borders. This information is time-sensitive and is more than necessary in the fight to stop illegals crossing into the United States.

It is 2019, the 21st Century, with technology, surrounding us we should productively use it. The judicial system has its protocols and roadblocks for law enforcement to garner valuable time-sensitive information expeditiously. The contents of a mobile phone are vital to follow through with intelligence gathering.

Minutes count and current warrant processing is time-consuming and involves typically traveling to a judge for a physical signature.

When officers use **CloudGavel's Electronic Warrant Solution**, warrant processing can happen up to 90% faster. **CloudGavel** is the nation's leading authority and provider of cloud-based electronic warrants.

- 👮 The Officer on the scene uses the CloudGavel web app to generate a warrant.
- 👮 The electronic warrant is securely sent to a judge for review and approval.
- 👮 Judge reviews and electronically signs the warrant. Officer is notified of approval, prints and executes the warrant.

With *CloudGavel*, the average turn around time from warrant submission to approval is 27 minutes. *CloudGavel* is a cloud-based platform that allows users from any internet-connected device — from anywhere and at any time — to quickly initiate, document, and submit a state-specific warrant or subpoena to a duty-judge for rapid review and electronic approval.

For Border Patrol, this is a significant opportunity to join the 125 agencies in 6 states and counting, with over 10,000 users and hundreds of thousands of executed warrants who have successfully deployed.

- Reduces or eliminates travel time
- Warrants are completed on scene
- Officers can receive warrant approval within minutes instead of hours
- Secure video conferencing allows for administering oaths for affidavits
- Judge receives fast, comprehensive warrant request electronically
- Judicial review can be conducted anywhere at any time on any internet-connected device and allow a video conference with the requesting officer
- Electronic submissions reduce after-hours disruptions for the on-duty judge

Resolvment means the speed of relevant and precise information shared.

There lies the key, Communicate with us, and let's discuss your next steps.
