**Ignoring or not accepting our connection, solutions and continuing success is a mistake.**

**It shows you are on the wrong side of the Peelian Blue Line!  
*Policing is Vastly Different in This Unsocial World, Needing Immediate Change.***

Daily, just not now and again the failure of society makes the headlines. Violence against the police has never been so high, deadly, and nor has violence against each other.

Policing is **reactive**, making it so far behind the 'eight ball,' it is pathetic! Training for 2019 from the academies is not helping the situation by being out of date and not using today's technologies such as the Smartphone.

Societal change is front and center with drug selling, opioid usage, domestic violence, rape, millennials attitudes, aggressive gang culture and all forms of terrorism. What are some of the law enforcement hierarchy doing? The *same old same old* with leadership that is sadly either politically motivated or fearful of being fired by the council or commission which appointed them.

Predictive analytics, which we believe in wholeheartedly, is *useless* if you don't have the whole base information/data from street-level officers. Robotic checkboxes tell us nothing of actual value. They are designed like those surveys that do not give you the option to say what you mean or the real dynamic visual or audio facts of the situation.

Real-time communications in an upfront manner are critical, just like the most proactive division of law enforcement, the *Drug Task Forces* who have worked tirelessly to stem the drug trade using antiquated methods of photocopying drug buy funds and inserting them within the drug trade.

Now, the patented and proprietary **LENSS Currency Application** changes all of that with a global cloud CJIS secure databases and software which saves time keeping officers on the streets. Administratively follows the currency alerting the lead officers and importantly, is a *force multiplier* as all patrol officers can check money on individuals, they have reasonable cause to stop or when they are booked into jail.

So does the key to all of this, **LENSS (Law Enforcement Networking Sharing Solution.)** This global direct, real-time data/information two-way communications in sharing what all officers know, is revolutionary, not just as a 'buzz word,' but in reality. Five years of perfecting the crime tool that should have been in use decades ago and is now at all your officer's fingertips. Already solving the crime, protecting the officer's lives and changing the face of the drug cartel by reducing their cash flow.

Cash is the only means for the cartels to move and launder their ill-gotten gains. The uniqueness of **LENSS** assists not only in the tracking currency, it an absolute assistant within Ransomware, Bitcoin and, Crypto-currency, allowing the sharing of actions in real-time for expedited resolution.

It is still a conversational world, although with today's technology we must use our 'fingers and thumbs' as well.

Shared information/data is vital today, and **LENSS** is the **10<sup>th</sup> Peelian Principle!**

**It is Pure LENSS Logic!**

**Make an appointment; we will converse and, demonstrate the solution.**

**Police Best Practice is the Here, Needed & Demanded Change...**

**WE ARE IN THE NOW & KEEP YOU; IN THE KNOW...**
