The Force Multiplier You Have Been Missing

LENS S® (Law Enforcement Network Sharing Solution) has released the global database of currency, the **LENS S Currency Tracking Platform**, which in itself, is revolutionary, proprietary and patented in recording, tracking and querying currency.

Until now, law enforcement has had to record currency funds they are placing in the hands of criminals, drug cartels and organized crime for tracking by photocopying the physical notes. It is long-winded, boring, which then has to be checked by hand if a match is possibly found.

Now, **LENS S** put an extensive capability to not only deploy certified funds, but:

-  **record the currency, which is scanned**
-  **serial numbers recorded digitally**
-  **photographed digitally back and front**
-  **allocated a secure case number**
-  **then be placed within the **LENS S** global searchable database**

Any officer that stops an individual and is lead to believe they have suspicious currency can query the **LENS S** database. If the currency is part of an uploaded batch, the officer in charge of that case will be notified by text and/or email **within thirty (30) seconds**. The connection is now made and that officer has the detail of the stop/currency, importantly the telephone number of the officer who made the stop. They can now communicate. The officer who made the stop does not have any of the case data whatsoever, which means they don't know the reason or that the currency was part of a drug buy or organized crime currency insertion.

This is a major '**Force Multiplier**' for all law enforcement. This is extending the proactivity of crime fighting to the extreme, which is necessary for this technological age.

This is not just the capability of the **LENS S Currency Tracking Platform**! The attributes are far reaching as users of the platform have found out.

This is a module platform and to introduce all the capabilities at once would be so mind-blowing, it would slow the process down. Our experience in law enforcement allows understanding of the mindset of officers and management. That is why **Perceptive Intelligence** is such a global success.

LENS S

Law Enforcement Network Sharing Solution

Some of the other modules that interact on a daily basis globally.

Send & Receive Actionable Intelligence

LENSS is the *ONLY* system that allows officers to take the information they gather every day in their subject packets, FI Cards, and investigative notes and share it with fellow Officers across the jurisdictional boundary and across the nation—*instantaneously*.

Get Electronic Field Interview Cards

The Electronic Field Interview Card is a cumulative record, immediately accessible and searchable, to all Officers nationwide. Once created, an officer is notified via text and/or Email when any officer adds additional information to an FI card he or she created.

Get Investigative Alerts

Like BOLO's, Amber Alerts, Investigative Alerts are push notifications which expedite the dissemination of critical, time-sensitive information relating to emergencies and situations like active shooters, armed robberies, bank robberies, missing persons, and other violent crimes.

For more information, we are available and are visiting different parts of the global. It can be presented via a webinar, face to face with your Drug Organized Crime and White-Collar Task Forces is the ideal presentation method. We stimulate your minds in such a manner you wonder why you ever used the photocopying machine in the first place!

Let us converse! Find out when we are available for your state and agencies:

Call: (318) 995-1821 or email: ashton@perceptiveintelligence.com
