Means to Know Who Are the Challenged Individuals, Who Are Known to Law Enforcement & Is Sharable in real-Time To All Law Enforcement Has Been Here, in the USA & Working For Five Years!

The rhetoric of mass shootings and the demise of so many go on, and law enforcement is a reactive means. They cannot arrest or detain someone unless they have broken the law.

Proactivity is available by '**knowing**,' knowing information from within the community, families, friends who care and can report and stop these mentally challenged walking '**time-bombs**.'

It is all about processes, the methods used to make a stop traffic stop or interacting and garnering vital information from the communication, documentation, notes and importantly have available to all law enforcement across cities, counties, states, and borders.

There lies the key and does not have to be developed; it has been in operation more than successful for five years!

The politicians can scream and yell all they like begging for media attention in their '**blame game**.' Robust law enforcement solution designed the **Law Enforcement Network Sharing Solution** from the Street-Up! Not some software development company who thought they knew the streets but have never walked in a police officers shoes.

An intelligence-gathering network is a system through which information about a particular entity is collected for the benefit of another through the use of more than one, inter-related source.

The strongest negotiable currency is intelligence.

Furthermore, it is the ability to collect & share this gathered, valuable asset.

ENTRICAL is exactly this! No need for DOJ to demand someone develop a solution it is here and can be implemented nationally, connecting all law enforcement in knowing what other officers know about individuals and situations.

Resolvment means the speed of relevant and precise information shared.

WE ARE IN THE NOW & KEEP YOU; IN THE KNOW...
