

There are so many annoyances in the world of marketing, too many radio, television and Internet pop-up advertisements. Annoying, time consuming and the majority of them have no relevance whatsoever!

Ad clutter is prevalent and wasteful by those who have no idea about professional marketing and the ideology and culture of our ever-changing social world of meaningful marketing and advertising.

If you purchase a newspaper, which has declined in its billions of readers, listen to a specific radio station or watch a particular channel, the advertiser who choose that particular medium is only reaching a selective audience and not the masses.

ProxComm.Technology believes in true proximity marketing, close enough to be relevant for you, reaching out with pertinent information that will assist the shopper, visitor or those trapped in a waiting room environment in their decision-making process.

The Smartphone has changed the world of communications! Seven years ago, it all started with our innovative usage of *Low Energy Bluetooth Beacons*, which back then were *unaffordable*, not like today. This included our creativity in Asia with the QR Code Information Solution, which today is a \$9 Billion-dollar marketing industry. We have as a ProxComm Global Team been at the forefront of innovation and proprietary solutions for a means of marketing and advertising that reaches **ALL SMARTPHONES!**

The usage of Proximity Marketing is affordably skyrocketing with the mix of proximity beacons and QR Code. Never has there been such a marketing medium returning positive results with '**call to action**' notifications on all Smartphones.

Scan our QR Code which will also emulate our **ProxComm Beacon** proprietary technology...
