## The U.S. Virgin Islands & It's Surround Partners Using Cutting Edge Policing Communications, Intelligence & Information Sharing

*Real-Time Collected Data from All Officers is the Key to Paradise!*

Wednesday, April 18<sup>th</sup>, 2019 St. Thomas, U.S. Virgin Islands

Dr. Calvin G. Walwyn, Deputy Commissioner of Police, convened and hosted a meeting with law enforcement of the U.S. Virgin Islands, which included officers from the British Virgin Island to introduce **L.E.N.S.S. (Law Enforcement Network Sharing Solution)**, which was demonstrated by Russel Sarpy, (**LENS S** Founder).

To be effective in law enforcement to protect and serve all citizens and visitors alike, you must have real-time information and data. Making our police forces globally smarter, cost-effective and absolutely *'in the know.'* It is about officer safety and those they protect with cutting edge A.I. logical technology.

Each officer, through **LENS S**, has real-time information either on the in-car laptop or Smartphone which they can add more details too with every call for service, incident or traffic stop.

Connecting all officers in real-time, including **BOLO (Be On The Look Out)** incidents that can cover all three islands and associated policing partners in the region within thirty seconds with details and photographs. Being used for active crime incidents and Amber or Silver Alerts.

# LENS S

Law Enforcement Network Sharing Solution

**LENSS** is a two-way sharing of data/information with all officers in real-time on one screen, saving time, money and effort in this demanded crime-solving world. Now, *'officers know what all other officers know'* to excel in efficiency and secure the community. Not just the officer's observations but using License Plate Recognition cameras with **LENSS** enables more information at the fingertips of officers.

Russel Sarpy stated, *'this association with **LENSS** takes the U.S. Virgin Islands policing and partners to an unprecedented level of security by not missing or losing street-level information that connects incidents and criminality.'*

All criminality is now front and center, including all forms of crime and safety, proactive Drug Task Force Interdiction, Money Mules, Money Laundering, Gun Running, Human (including Child) Trafficking and Smuggling.

**LENSS** is a global solution which has been in effect for five years in the U.S.A. with immense success and now expanding globally for all to benefit.

Revolutionary for the U.S. Virgin Islands; it partners and citizens/visitors alike. Dr. Walwyn stated, *'the ultimate goal is to protect the entire Caribbean.'* These are no days of old, far-reaching **LENSS** technology makes the islands even more attractive for its immense tourism and ecological status.
