Serial Killers & Organized Crime have Trackable Financial Serial Numbers

Drug cartels, organized crime and those that wish to deceive, use **ca\$h**. They cannot afford to be tracked by technology within the financial world, but they can be and are by those that have adopted the **LENS Currency Tracking Platform**.

Let us not beat around the bush, **ca\$h** is an issue in further the supply of drugs, money laundering and organized crimes *true* cash flow. The drug cartel has to have that cycle of supply and return. They pay cash to manufacture, distribute and then return their enormous profits, which are in cash to enable them to start the cycle all over again.

It is the same for organized criminals, using a cycle of distribution of monies through *money washing* businesses. They open business fronts that are cash only business and mix their criminal monies to their daily business, hoping to hide those illicit funds.

Every single outlet for cash can now be tracked. Once **Organized Crime or Drug Buy Funds** are placed in society, they get spent.

Just think, where can you be invisible and spend money among others who are legitimately spending their cash?

- Auction House (Art, Cars etc.)
Real Estate (Large Property)
- Boat Dealer (Expensive Boats)
Various Cash Businesses
- Car Dealers (Expensive Cars)
Casinos (Business & Pleasure)
Gambling of All Kinds

Let us concentrate on these that spring to mind. These are exactly what the drug cartel, organized crime and most of you think are the cash or currency outlets.

Law enforcement today are using the same methods of inserting known funds into the drug and organized marketplace. You are photocopying the currency, or taking pictures with your Smartphones, then placing in an envelope. Waiting for someone to find the currency on the streets so you can retrace the thread of who had it and where it has been. It sadly has to be retrieved and checked across the original photocopies or photographs, which is boring and rarely brings the results you were looking for. In reality, it is a failure, but that is the method, until now!

If you are doing this, then you are our client and we will take you into the 21st Century overnight!

All the copier companies will wonder why your volume of photocopying has drastically gone down and your time management efficiency has skyrocketed!

Law Enforcement Network Sharing Solution

Another secret, the **LENS** Currency Tracking Platform® increases those working on drug cases exponential and is the '**Force Multiplier**' without having to hire more street-level officers.

Imagine that, a solution that is so affordable and acceptable, that no one ever thought of it before. A DEA, ACC was recently dumbfounded when introduced to this revolutionary **LENS** Currency Tracking Platform. Every single objection on why it couldn't be introduced and utilized was dispelled in seconds. *Created by former law enforcement for law enforcement.*

It is secure, CJIS compliant, real-time database with extreme necessary encryption.

So, what are we talking about? When preparing for a '**Drug Buy**', simply follow these steps.

The LENS Currency Counter and Proprietary Patented Software Platform:

- ① counts the bills, virtually all denominations,
- ① records the serial number
- ① takes pictures of the front and back of the currency
- ① now create your case file and send to the cloud

All in seconds...

This case related currency

is now on the **LENS** Network, within your agency, all related street officers are now working on your case. They make a traffic stop and the individual is suspicious, he or she has cash on them. The officer simply using either their laptop or their Smartphone enter **LENS** in the cloud and check the serial numbers of the currency. If there is a hit, they are informed for reasoning to further detain the suspect.

The original detective who uploaded the '*Drug Buy Funds*', is now informed by SMS Text and Email within thirty (30) seconds, that some of that currency has surfaced and the individual in whose possession it was found has been detained. The two officers can now communicate and solve another case.

The street-level officers have not been apprised that this currency is '*Drug Buy Funds*' or has access to the case file whatsoever. This guarantees the anonymity of the case or for what purpose further investigation is required.

This is a '**Force Multiplier**' *Extraordinaire*, the likes of which have never been seen before. It is a true global networking tool for stopping the currency trafficking and drug cartels ability to hide the cash. The one means that dominate the drug trade, currency, cash, their lifeblood and potential death sentence to others.

The **LENS** Currency Tracking Platform is the **game changer** for the **High Impact Drug Task Agency, DEA, ATF, County Sheriff, and City Police Forces**. It is identifying the cash, the sources and removing the cash from the system and importantly those attached to it.
