THE POWER OF LENS

Perceptive Intelligence with its **Law Enforcement Network Sharing Solution (LENS)** is truly a one of a kind and never been achieved before with this unique platform. Communications in the form of data sharing across agencies, borders and globally, ensuring officer safety and closing cases far quicker by this exceptional and sole solution.

Now, with **LENS**, law enforcement officers receive more than just DMV/NCIC returned information, they see data from every officer that has touched a vehicle, person, call for service or event on one screen. In turn, those officers who reported are being contacted instantaneously by email and SMS text message, which puts them in direct communications on the subject matter at hand.

To add to the global communications first, the **LENS Currency Tracking Platform** which is also readily available as a global solution.

Stop photocopying your '**Drug Buy Funds**' and then scrambling to check if retrieved currency matches when spending hours attempting to cross-reference currency.

We have our true game changer technology and a '**real-time database**' at hand. Feed the currency you either seized as an asset forfeiture or from a suspect and count/record through the **LENS Currency Counter**, which automatically counts the money, records the serial numbers, takes pictures of the front and back of the notes in seconds. It is then placed in the digital cloud with access by administratively approved individuals, which includes street officers. The currency is then placed in evidence with a solid print-out, which can be rechecked by a supervisor in seconds, as there is no hand recount necessary. Add your case notes, contact information, both mobile-phone and email.

Now go make that undercover drug buy.

When any street officer stops someone with suspect currency, he or she can check directly through their laptop or Smartphone with the **LENS Currency Tracking Solution**, if there is a hit, the original officer is contacted automatically/ instantaneously via email and SMS text. Now you solve the case and have connected through being a '**force multiplier**', expanding your footprint to close down currency traffickers.

I hope this reminder of what **Perceptive Intelligence** helps, if you have any questions of how we can both be working together, please contact us.
