## **Unfettered Access Without Security Checks to Casinos, Sports Events, Concerts, Corporate Complexes, Shopping Malls, Schools, Churches, & Hospitals Is No More!** ***Your Duty of Care Cannot Be Negated!***

Senseless killing is not restricted to somewhere else; it can happen anywhere. All forms of terrorism, both domestic and international are on our doorsteps. These vile cowards are among us and can and will strike at any time. Time is what we do not have as the liability, and moral factors are right in front of our eyes, and there is no insurance policy to protect you 100%.

In the event of a successful attack by those patient perpetrators, which leave an unremovable stain on the community, your business and the families of the loved ones lost, make headlines, but what will be the residual outcome?

In the USA, 9/11 has all been forgotten in the sense of why we have to secure ourselves, and, as the UK's, 7/7. The complacency of our surroundings is more important than ever in this day of **'finger and thumbs'** the texting, Twitter, Facebook, Instagram, and other social media addictions. Talking and engaging in real conversation is either gone or become nonexistent.

### ***Meaning, our vulnerability is immense!***

Societal portions, well, in fact, the majority of our society are so vulnerable with unfettered access to buildings, it is more than concerning. We know the potential of an incident is coming, and all we do is have **'glorified fire drills'** that are an excuse to meet folks from another floor, which you have not seen since the last fire drill! The fact is they do not prepare you for the reality of the probable occurrence.

WWW.POLICEBESTPRACTICE.COM

Our work in the ability to share secure, compliant information in **real-time** is unmatched in the policing or the security industry. There has never been this patented and useful communications ability in both reality and Artificial Intelligence.

It is the ability to build an understanding of the inner workings of the facility and those that garner access. The last five years this **ENSS (Enforcement Network Sharing Solution)** has been active in policing with immense success and security of officers and individuals. It is now available globally in the commercial world and is proving the same stunning capabilities and results.

It is vesting every individual within your organization to be a significant player in the security of the facilities. Through administrative control, each has access at differing levels, all though they can communicate with the control center. It is all within the cloud and uses the Smartphone, either corporate or an individual's device. The days of a Marconi radio are gone!

**ENSS** is far more than a mobile messaging solution that you invest dearly in; it is Smartphone communications on steroids and beyond. It is also connecting all incidents to public safety assistance; it is faster than making a 911 call. It is utilizing CCTV, LPR, and proprietary technology that is useable by all.

Information surrounds us; it is what we call **Atmospherics**, like dust in the sunlight through a window. Now those that see and hear have all your backs, your 6, which in society today is such an essential safeguard.

We do not discuss the contents of the solution as we do not wish to inform the potential attackers. We assure you, once we have a Memorandum of Understanding, all will then be revealed.

**It is Pure ENSS Logic!**

**Make an appointment; we will visit in person, or converse and demonstrate the solution.**

**Police Best Practice is the Here, Needed & Demanded Change...**

**WE ARE IN THE NOW & KEEP YOU; IN THE KNOW...**
